I'm a Product/Project Solution consultant and a Developer with an experience in working for Wipro Technologies and it helped me a lot in making myself utilize and hone my skills to the best. I have worked on many real time projects and received a lot of recognition for the same. I have **4 years experience**, working in E-Commerce and Banking Domain. Investing my time on creating /developing /innovating is a passion for me.

Until recently, I was working on lot of research related to exploration of IAAS provided by cloud solutions on how we can automate various modules for a specific domain including code Development, ORM, Infrastructure. Focus was more on Microservice architecture.

Colleagues know me as a highly diligent person, who can always be trusted to come up with a new approach. I like spending lot of time knowing everything about the topic I am working on, it always makes the work more interesting .I'm at my best collaborating with others while working.

I'm open for opportunities to contribute and learn, I can be reached either through this profile or by mail at siddharthbisoi2@gmail.com
